On 31 July 2022, Ayman al-Zawahiri, the leader of al-Qaeda, was killed by a US drone in a “precise tailored airstrike” using two Hellfire missiles. President Joe Biden announced this crucial milestone in American counter-terrorism operations on 1 August 2022. As per reports, al-Zawahiri was residing in a safe house in Kabul, owned by an aide of Afghanistan’s Interior Minister Sirajuddin Haqqani.

Americans did not inform the Taliban officials about the strike before it occurred and claims have been made that senior Haqqani Network members previously restricted access to the house where al-Zawahiri had taken refuge and they relocated his family elsewhere

While addressing the strike from the White House, President Biden reminded the world about the former al-Qaeda leader’s role in 9/11 attacks and planning numerous other attacks against his fellow Americans. He also spoke about the deliverance of justice with this operation and asserted that “We make it clear tonight, that no matter how long it takes, no matter where you hide, if you are a threat to our people, the United States will find you and take you out.”

The Taliban spokesperson, Zabiullah Mujahid, while condemning the U.S. strike in what he referred to as “a residential house in Sherpur area of Kabul city,” called strike to “a clear violation of international principles and the Doha Agreement— [CNN News](#), [Politico](#), [BBC News](#)

## BIN LADEN’S DOCTOR OF DEATH

Ayman al-Zawahiri stands behind bars in an Egyptian court in 1982

Ayman al-Zawahiri was believed to be the true architect behind the Sept. 11 attacks and was present at the founding of Al-Qaeda with Bin Laden in 1988. In the early 90s, Zawahiri became head of a militant organization named the Egyptian Islamic Jihad (EIJ). The EIJ had been responsible for the assassination of President Anwar Sadat in 1981. Al-Zawahiri later merged EIJ with Al-Qaeda in 1998 to form the World Islamic Front for the Jihad against the Jews and the Crusaders.

Al Zawahiri masterminded the 1998 bombings of American embassies in Tanzania and Kenya. He also engineered the attack on USS Cole in 2000. Before his death, he was one of F.B.I.’s most wanted terrorists. He also had a \$25 million bounty on head. — [CNN News](#), [NPR](#)

# GRENADE BLAST ROCKS KABUL CRICKET STADIUM: 2 KILLED

EXPLOSION SHOOK HUNDREDS OF SPECTATORS WATCHING T-20 MATCH

Two pictures taken at the scene of the blast and spectators panicking on the other side of the Kabul International Cricket Stadium on 29 July 2022.

A grenade explosion during a match at Afghanistan's main cricket stadium injured four spectators and briefly halted the game on 29 July 2022, officials and police said. The explosion happened at a match between Pamir Zalmi and Band-e-Amir Dragons in the country's domestic T20 league, held at the Kabul International Cricket Stadium.

Hundreds of people were at the match on a Friday, the weekly holiday in Afghanistan.

Kabul police spokesman Khalid Zadran said the explosion was caused by a grenade, adding that the game was stopped for a few minutes.

It injured four spectators, said the Afghanistan Cricket Board's chief executive Naseeb Khan.

"The players, staff members and foreigners are all safe," he said on Twitter, without offering details.

This year's edition of the Shpageeza Cricket League — its eighth season — is the first such tournament since the Taliban came to power in August last year.

Its eight teams have many players from the country's national team.

Cricket is a popular game in Afghanistan, with many of its players gaining international recognition.

While levels of violence in Afghanistan have receded since the Taliban's takeover, the jihadist group Islamic State (Khorasan) has carried out several bombings and gun attacks in recent months. The explosion occurred two days after one that went off near the entrance to Kabul's Gurdwara Karte Parwan. There were no reported fatalities in the incident. — [Times of India](#), [Cricketaddictor](#)
